

# Company Profile

Established in 2014, Verus Resource Management, Inc. is a Hispanic-owned small business focused on advancing energy management programs within the federal sector. Verus delivers results through an experienced team of subject matter experts, representing a comprehensive portfolio of energy management acumen.

We have an extensive history of providing successful, financially-sound, and responsive project and task management. Our performance can be attributed directly to a flexible organization structure that maximizes our ability to form unified, interdisciplinary task teams quickly; and proven management procedures that establish a rigorous system of effective management controls. Our management approach relies on open lines of communication both internally, and with our clients. We ensure accountability at all appropriate levels for cost, schedule, quality, performance, and above all, client satisfaction.
